

## Other hole-finishing solutions from Cogsdill

In addition to Shefcut™ precision reaming and boring tools, Cogsdill also offers burnishing tools. Like Shefcut tools, Cogsdill burnishing tools provide accurate size and fine finish. Burnishing, however, is a chipless metal displacement process that generates surfaces smoother and more wear-resistant than an abraded surface of the same profilometer reading.

Ask for our full catalog or view it on our Website at [www.cogsdill.com](http://www.cogsdill.com).

Internal Roll-a-Finish® Tool

Adjustable burnishing tools from stock in popular hole sizes, and in various work lengths. Special designs available to suit the application.
